MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Company's performance for the year ended 31st March 2014 and the Management's view on the future outlook are detailed below:

Industry structure and developments

Cement industry plays a vital role in the growth and development of the Country and Economy. However during the last 2-3 years growth has been stagnating because of policy paralysis, lack of focus on development and delay in implementation of various projects in infrastructure, industrial and other sectors. With delay in stimulus packages coupled with a slowdown in construction activity, lower spending in infrastructure, real estate, housing schemes and yojanas, the growth has slipped in cement industry. While growth in cement consumption in 2013-14 was not at all encouraging, there is hope of recovery in the ongoing fiscal because of political stability both at the centre and state, expected revival in the economy in general and the construction sector in particular.

The Government of India plans to increase its investment in infrastructure to US \$ 1 trillion in the Twelfth Five Year Plan (2012-17) as compared to US \$ 514 billion expected to be spent on infrastructure development under the Eleventh Five Year Plan (2007-12). The company is also optimistic and expects demand of cement will improve during the Twelfth Five Year Plan. Moreover a strong and stable government has been formed at the centre providing a big push to the economy.

Opportunities and threats

Infrastructure projects such as the dedicated freight corridors, new air and seaport, housing sector, road transport and highways etc. provide significant opportunities to cement sector. It is to note that satellite towns are seeing significant housing demand, on back of lower land cost and is expected to drive cement demand. All this brings about a tremendous scope for the cement industry in the country.

Cement is a commodity business and sales volumes mostly depend upon the distribution reach of the company. We have established strong dealer and direct user networks and expertise in producing various grades and varieties of cement over the years.

The cement industry in India faces number of regulatory issues such as land acquisition, obtaining mining rights,

obtaining environment clearance and process, lack of clarity in the policies etc. which should be simplified by the Government. The demand-supply situation, shortage of coal, volatile fuel prices, freight charges, labour cost etc. have affected the selling price and put the margin under pressure.

Outlook

The Indian cement sector is expected to witness positive growth in coming years. It depends on government to push investment in infrastructure projects, policy changes that are necessary to speed up. Lower demand, pricing pressures and increase in cost resulted in muted performance of cement companies.

Cement demand across the country during the year continued with sluggish demand. Non-availability of sand, an important material in building construction lead to slowdown in the infrastructure segments, construction and housing sector and has impacted in the performance of cement sector. Cement industry has witnessed massive capacity additions during the past five years which has resulted in significant pressure on price realization and also on capacity utilization. If the slowdown, overall sluggishness and lowering volumes continues for an extended period, it would deeply impact the growth in consumption of cement.

Risks and concerns

Your company does not perceive any serious risk or concern apart from the normal business areas of risks connected with the cement industry in general, few of which are:

- Risk associated with lower capacity utilisation
- Coal supplies and its prices.
- Transportation costs both for input materials and finished goods.
- Changes in Government policies.
- Labour / manpower risk.
- Finance and interest rate risks.

Internal control systems and their adequacy

Your company has an appropriate and sound internal control system for the business process, with regard to efficiency in operations, financial reporting and controls, compliance with applicable laws and regulations etc. The system has a process designed to take care of various

control and audit requirements which ensures that all the assets are protected against loss from unauthorized use and all the transactions are recorded and reported correctly.

An external independent agency of chartered accountants has been appointed as internal auditor to independently audit the Company's accounts and operations. Regular internal audit and checks are carried out to ensure the robustness of the systems. The internal auditor submits their reports to the Audit Committee of the Board of Directors. The committee also reviews the adequacy and effectiveness of internal control systems and suggests improvement as and when required.

Financial and operational performance

The revenue generated from operations for the year 2013-14 is ₹ 44878.99 Lakh against ₹ 58056.19 Lakh in the previous year. In terms of quantity 1079177 MT of cement were sold during the year 2013-14 as compared to 1418173 MT sold in the previous year.
